

### **In the Specification**

Please replace the paragraph beginning on line 8 of page 14 with the changes shown below:

The redundancy indicator 630 indicates the level of redundancy required for the target volume. In one embodiment, the redundancy levels range from JBOD (no redundancy) to ~~to~~ RAID level 50. The auto-select target indicator 632 indicates whether the target volume is to be automatically selected or manually specified via the target volume indicator 634 and the target extents indicator 636. The target volume indicator 634 indicates the target volume for the included snapshot operation while the target extents indicator 636 indicates the starting and ending indices of the regions to be used on the target volume.
